

Gesellschaft für Informatik e.V. (GI)

publishes this series in order to make available to a broad public recent findings in informatics (i.e. computer science and information systems), to document conferences that are organized in cooperation with GI and to publish the annual GI Award dissertation.

Broken down into

- seminars
- proceedings
- dissertations
- thematics

current topics are dealt with from the vantage point of research and development, teaching and further training in theory and practice. The Editorial Committee uses an intensive review process in order to ensure high quality contributions.

The volumes are published in German or English.

DELFI 2026 is the twenty-fourth event in a conference series focusing on the discussion of the newest issues arising from research and practical experiences in the field of educational technology. The carefully reviewed contributions reflect state of the art in various areas of educational technologies within computer science and related domains, including content engineering and content management, architecture and tools, interactive technologies and media, cooperation and collaboration, case studies, and educational models and environments.
